DETAILED ACTION

Election/Restrictions

Claims 1-14, 16, 17 and 23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claim 22 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification does not adequately disclose the liquid coating vaporizing while the coating engages the balloon wall as recited in lines 7 & 8 of claim 22.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15 and 18-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lalonde et al. '959 further in view of Lehmann et al. '019. Lalonde et al. disclose a method for treating a blood vessel comprising introducing a catheter into the blood vessel, expanding a balloon of the catheter to engage the vessel wall and expanding fluid at a first location. Lalonde et al. teach all of the limitations of the claims except expanding a fluid at a second location. Lehmann et al. disclose a similar method and teach that it is old and well known to expand a fluid in multiple locations within the device (see figure 25) to allow greater aggregate cooling. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide a second fluid injection member on the Lalonde et al. device to provide a means of allowing greater aggregate cooling.

Response to Arguments

3. Applicant's arguments filed 1/2/04 have been fully considered but they are not persuasive. Regarding the argument that the difficulty of circumferentially even cooling of a radially expandable balloon does not appear to be reasonably taught or suggested in the art. In col. 10 lines 41-48 Lehmann et al. teach that the staggered inner members may be simultaneously provided with cryogenic fluid to create a linear lesion for selected applications. Circumferential even cooling is obtained by simultaneously provided the cryogenic fluid as disclosed by Lehmann et al. Regarding vaporization of the fluid Lehmann et al. also disclose in column 3 lines 54-60 that the fluid may be vaporized in order to achieve an extremely low temperature.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
